### **Principal Report**

Through the lesson planning activity session, students are given information on how to write unit objectives and explanations as well as how to outline the entire lesson.

Through this demonstration, information is given to the students about the overall aspects that have to be considered while preparing a thesis about a content.

In practice lesson schools students take all the lessons strictly in their allotted time

When the actual internship period begins, a certain group is given the responsibility of maintaining the entire school

During the internship period, along with teaching, co-curricular activities, extra-curricular activities, organizing various competitions, organizing trips, gaining administrative knowledge, observing expert lessons, mentoring and mentoring each other, trying to take innovative lessons, students can learn all these things.

How to prepare the timetable, how to plan the weekly lessons, how to plan the curriculum, how to record the attendance of the students, how to help the students to overcome the difficulties they face, all these aspects are learned by the trainees in the school experience program i.e. the internship program.
