### **Report about energy policy**

According to the principle "Saving electricity means generating electricity", strict regulations regarding the use of electricity have been made in the college. Regarding the use of electricity, instructions have been given through notice boards. In order to save electricity, LED bulbs have been used everywhere.

As the classrooms have windows, most of the classrooms are bright, so electricity is not used during the day; electricity is used only where necessary.

College office work is based on computers and laptops, generators are used as an alternative when there is no electricity. The college is far away from the city so the environment is very healthy and pollution free.

Trees are planted every year in the college premises.

Every year on the occasion of Environment Day, for the purpose of environmental awareness, street plays, wallpaper presentation, cleanliness drive and tree plantation activities are carried out as per need. The college premises have a pleasant learning experience due to the scenic environment.

In order to keep the college campus clean, waste management has been implemented and wet waste and dry waste are collected separately and disposed of in a proper manner. Office work is mostly done through paper printing. A paper saving policy is adopted.

The college has constructed its own bore well. Water from this is planned economically. The policy of "Pani Jirwa Paani Vachava (Drain the water, save the water)" is used. Instructions regarding water conservation are given through notice boards.

Activities for social welfare like waste management, saving electricity, economical use of water, environment conservation, tree planting, cleanliness drive, prevention of pollution are frequently implemented. First it is implemented by the college.
