### **Waste Management - Report**

The organization has a policy and procedure for implementing waste management. The organization has properly planned the waste generated here.

#### **Solid Waste Management -**

Solid waste materials are collected in separate dustbins. There are garbage cans. For regular solid waste collection, at different locations, the garbage cans are kept in the campus. The institute has a proper waste management. More than five years old used internal assessment answer sheets, practice notes and old newspapers are sold to local vendors for recycling. The institute has composting pits. Biodegradable waste along with plant waste collected from college campus is converted into compost. Vermicompost is used in gardens, as a fertilizer for trees.

#### **Liquid Waste Management -**

The liquid waste in the college is disposed of through piped drainage. Instructions are given from time to time for students and staff to avoid wastage of water. Instructions are displayed at various places. Students are sensitized about water conservation through various activities like water conservation and tree plantation drives.

#### **E-waste management -**

Students and faculty are discouraged from using CDs as well as other temporary e-resources and WhatsApp groups are created for each batch and most of the information is shared on WhatsApp groups and through email to reduce e-waste. For proper e-waste management, useful parts of electronic gadgets are removed before being disposed in a separate dustbin.
